

ENG

DUCTOS
GROUP

The Company

Ductos started off as a private limited corporation in July 1992, as a result of an already long collaboration between its partners, collaborators and consultants, working together in the preparation and implementation of studies and projects for public and private entities.

Ductos professional and technical staff includes a team of Engineers, who possess qualifications in the several fields of Engineering. Our professional and technical staff are supported by CAD technicians, administrative staff and when necessary, consultant specialists in various subject areas.

With a sustained growth and implantation in international markets, **Ductos** is now known as **Ductos Group**. With local societies constituted in **Mozambique** and in **Macau**, we also consolidated our position in such significant markets like **Angola, Brazil, Cape Verde, Morocco** and **Algeria**, where we continue developing studies and projects in several areas.

Internationalization

As a result of **Ductos** development and its growing role within international markets, a strategy was defined looking to establish new society constitutions and partnerships in countries which have Portuguese as the official language.

By September 2009 **Ductos** was already established in **Angola**, in order to provide a direct response to its customers, projects, and on-going work in this country.

Ductos is also present in **Mozambique**, where in July 2012 established a new society, having its headquarters in Maputo.

Project Fields

Having a group of engineers and technicians with a solid experience in our subject fields, **Ductos group** provides services in the following areas:

General Infrastructure;
Basic Sanitation;
Hydraulic Installations;
Sustainability.

In partnership or using external consultants, **Ductos** also provides studies for the following fields:

Structures and Foundations;
Special Technique Installations.

Specialties

General Infrastructure

- Road Infrastructure;
- Water Supply Infrastructure, Irrigation, Fire Services;
- Domestic Waste Waters and Rain Water Infrastructure;
- Gas Mains Infrastructure;
- Electrical Infrastructure and Lighting;
- Telecommunications Infrastructure;
- Urban Solid Waste Infrastructure.

Hydraulic Installations

- Water Supply Equipment and Installations;
- Water Equipment and Installations for Fire Services;
- Water Drain Systems and Installations for Domestic Waste Waters and Rain Waters;
- Fuel Gas Mains Installations.

Basic Sanitation

- Water Supply;
- Sanitation;
- Water Treatment Station;
- Waste Water Treatment Station.

Sustainability

- Sustainable Construction;
- Systems Centralization;
- Economy of the Consumption of Water;
- Exploration Economy;
- Use and reuse of water resources, especially rainwater and domestic waste waters for irrigation, washing and special consumption systems.

Other specialties

- Health and Safety Plans;
- Urban and Municipal Solid Waste;
- Medical Gases;
- Hydraulic Circuits in Pools and Water Games.

Projects in Partnership

Structures and Foundations

- Studies and evaluation of existing constructions;
- Geotechnical Report Analysis;
- Excavations and Earthworks;
- Foundations, underground and surface floor structures.

Special Technique Installations

- Installations and Electrical Equipment;
- Installations and Communication Equipment;
- Installations and HVAC Equipment (Mechanical);
- Installations and Electromechanical Equipment;
- Integrated Security;
- Acoustics;
- Temperature Control;
- Centralized Technical Management;
- Luminosity Studies;
- Audio / Video / Home Automation.
